

# Stainless Steel Chain

Vitaquip Stainless Steel Short Link Chain is designed for marine-grade corrosion resistance and long-lasting durability in demanding environments. Manufactured from high-quality 316 stainless steel, this marine-grade chain provides excellent resistance to rust, saltwater, and chemicals, making it ideal for marine, industrial, architectural, and food-grade applications.

Available in 8mm to 16mm sizes, this non-lifting stainless steel chain is supplied in custom lengths for securing, anchoring, and restraint applications. Designed for reliable performance in harsh environments.

- Grade 316 Stainless Steel Construction
- 8mm to 16mm Chain Sizes
- Durable Short Link Design
- Wide Temperature
- Custom Length Supply
- Not Suitable for Lifting

| Item Code | Link Diameter A (mm) | Inside Link Length B (mm) | Inside Link Width C (mm) | Weight Per Meter (kg) |
|-----------|----------------------|---------------------------|--------------------------|-----------------------|
| SSC08     | 8                    | 27                        | 11                       | 1.32                  |
| SSC10     | 10                   | 34                        | 14                       | 2.12                  |
| SSC13     | 13                   | 44                        | 18                       | 3.8                   |
| SSC16     | 16                   | 54                        | 21                       | 5.7                   |
